

## Installing VPN on your PC or Laptop

<p>Load up your web browser and go to <a href="https://freedomvpn.verticalsystems.co.uk">https://freedomvpn.verticalsystems.co.uk</a> and enter the username and password that has been provided to you.</p>	
<p>When you click “Go” it will ask you to click the link and download the VPN Client.</p> <p>Click on the link to download this and a download will show in the bottom left of your browser (Only Chrome) you just need to click/run this.</p>	
<p>Once this is done the installer should be running. It should ask you if you would like to allow the VPN access. Please click “Yes”</p>	
<p>Once the installer has completed there should be an OpenVPN Connect icon on your desktop.</p> <p>Double click the icon to connect to your VPN</p>	
<p>It will then ask if you would like to allow access to connect to the VPN. Please click “Yes”</p>	
<p>Once this is done. the Install is now completed.</p> <p>The next time you would like to connect to the VPN you will just need to Double click on the icon and you will be automatically logged in.</p>
